

## **Lithos3D: processing tridimensional soil models – ver.3**

## **Lithos3D: elaborazione di modelli tridimensionali del terreno – ver.3**

Lithos 3D allows to process tridimensional model of the soil ground by correlating single stratigraphic columns, through the following methods:

Minimum Curvature Splines

Kriging

Inverse Distance Weighting Observations

Natural Neighborhood

Linear triangulation

Lithos3D permette di elaborare modelli tridimensionali del sottosuolo, attraverso la correlazione di singole colonne stratigrafiche, attraverso i seguenti metodi:

Minimum Curvature Splines

Kriging

Inverse Distance Weighting Observations

Natural Neighborhood

Linear triangulation
